*Compact Vulcanizing Presses, Type
VULCOFRAME*

Compact Vulcanizing Presses, Type VULCOFRAME

The "Two-Piece" Vulcanizing Presses for Splicing of Steel Cord and Fabric Belts

Features

- solid framework
- uniform pressure by means of pressure bags
- integrated water cooling system
- different heating systems available
- robust traction bolts for mechanical or hydraulic operation
- electronic temperature and pressure monitoring
- optional monitoring and registration of the whole vulcanizing process

Advantages

- quick assembly and disassembly
- quick cooling due to water cooling
- protected pressure-bags and heating plates
- centralized connections for electricity and pressure system
- reduced downtimes
- compared to removable presses:
 - less spare parts required
 - longer service life

Technical Data

Compact Vulcanizing Presses VULCOFRAME are available for the following belt widths:

Belt Width	63"	80"	88"	96"	112"

The customer's specific technical requirements will be considered.
