

TIGER-LINE 38 / BB PINK

FEATURES

TIGER LINE 38 / BB Pink is a highly elastic grade 38 Shore A natural rubber specifically designed to attain excellent resistance to wet fine and medium size particle abrasion applications.

TIGER LINE 38 / BB Pink is manufactured and then one side is pre-Roughened in the factory. This roughened surface is ideally suited to assist the applicator in the bonding procedure

TYPICAL FIELDS OF APPLICATIONS

- Slurry Pipe Lining
- Cyclones Components Linings
- Cement Transfer Socks
- Screen Components
- Floatation Cell Tank Lining
- Valve and Pump Linings
- Chute and Launder Lining
- Pulleys and Return Rollers

TECHNICAL INFORMATION

Colour	<i>Pink with a Roughened Back Surface</i>
Specific Gravity	<i>1.13 g/cm³</i>
Hardness	<i>38±5 Shore A</i>
Abrasion	<i>110mm³</i>
Tensile Strength	<i>20 N / mm²</i>
Elongation at Break	<i>650% Minimum</i>
Available sizes:	<i>3mm, 6mm, 10mm, 12mm Thick / 1500mm Wide x 10mtrs in Length</i>

*The information given above is based on random test results during production and represent the average result of our products as given from a statistic long-term evaluation. We reserve the right for changes to technical specifications without prior notice, provided they ensure technical improvement without major modifications of the products. Coloured rubber products containing the polymer NR, can change their colour due to natural deviation of natural rubber.
